PROFILE

I am a self-taught developer with 4 years of coding experience and 2 years of work experience. Mainly focused on JavaScript/TypeScript and its framework React and JS runtime Node.js. I have successfully implemented responsive designs, converted Figma designs into React components, and debugged software to improve performance. My experience in JavaScript and React, has allowed me to create efficient single-page applications and reusable components, reducing code duplication and easing future maintenance. I am eager to bring my technical skills and learn new ones along side the development team.

I want to take a moment to thank you for reviewing my CV. I truly appreciate the time and effort you have put into considering my application.

If you have any questions or need further information, please feel free to reach out.

Thank you once again for your attention and support.

Best regards,

Igor Stojadinovic
