Summary

Few years ago, I decided to requalify and pursue career in programming. I enrolled a Python coding bootcamp and over time learned full-stack web development. My favorite part of programming is the problem-solving aspect. I love the feeling of finally figuring out a solution to a problem. My core stack is React, Next.js, Node.js, and MySQL. I am also familiar with TypeScript. I am always looking to learn new technologies. I am currently looking for a full-time position as a frontend developer.

When I'm not coding, I enjoy working out, watching movies, reading, and listening to Huberman lab. I also enjoy art. I've been studying at Watts Atelier for several years now.

Thank you for taking the time to read my CV and Cover Letter. I'm looking forward to the opportunity to discuss how can I contribute to your organization.

GitHub: <https://github.com/IgorStojadinovic>

I am open for relocation to Novi Sad/Belgrade if needed.

Experience

Full Stack Engineer

WowYow AI

Jan 2023 - Sep 2023 (9 months)

- Implemented a responsive design that optimized the application for mobile devices
- Implemented a user history functionality
- Debugged software, identified root causes, and proposed solutions to software issues
- Implemented a single-page application using React and Redux that improved overall performance and usability
- Created reusable components to reduce code duplication and ease future maintenance
- Utilized Node.js to create server-side applications
- Implemented a REST API using Node.js that allowed for efficient data exchange between the web application and the backend database
