PROFILE

As a Software Developer with 1 year of experience, I have successfully implemented responsive designs, converted Figma designs into React components, and debugged software to improve performance.

My expertise in React, Redux, and Next.js has allowed me to create efficient single-page applications and reusable components, reducing code duplication and easing future maintenance.

Additionally, my proficiency in JavaScript, Node.js, Express, and MySQL has enabled me to contribute to backend tasks and optimize overall application usability.

Also my art background adds a unique perspective to my problem-solving approach for frontend development. I am eager to bring my technical skills and innovative solutions to a dynamic software development team.

I wanted to take a moment to thank you for reviewing my CV. I truly appreciate the time and effort you have put into considering my application.

If you have any questions or need further information, please feel free to reach out.

Thank you once again for your attention and support.

Best regards,

Igor Stojadinovic
