PROFILE

I'am very dedicated to developing software solutions. Although I am not formally educated in the IT field, I independently gained a deep understanding of various technologies and concepts through intensive work and research. I know most positions require a computer science degree, I could not afford it and the only option I had is to learn it on my own.

If my skills are not good enough in your eyes, I am open for any internship opportunity,

I am currently located in Vrbas, and I'm open to relocation to Novi Sad or Belgrade.

EMPLOYMENT HISTORY

Full-Stack Software Developer , WowYowAI (C9 Group)   Novi Sad
Jan 2023 — Aug 2023

- Implemented a responsive design that optimized the application for mobile devices
- Implemented a user history functionality
- Debugged software, identified root causes, and proposed solutions to software issues
- Implemented a single-page application using React and Redux that improved overall performance and usability
- Created reusable components to reduce code duplication and ease future maintenance
- Utilized Node.js to create server-side applications
- Implemented a REST API using Node.js that allowed for efficient data exchange between the web application and the backend database

MySQL

MongoDB

Next.js
